"With Paxit, nurses are spending half the time to pass meds versus bingo cards. They are also enjoying the Paxit system because it allows them to spend more time with residents, which is why we all went to nursing school. The extra time they are spending on resident care makes them happier."

-Nancy Allbaugh, RN,
Director of Nursing

Supporting you with resident-centered care

Our state-of-the-art pharmacy operations are based in Covington, OH; Baltimore, MD; Richmond, VA; and Marshall, MI. We support long-term care organizations throughout the Mid-Atlantic and Midwest.

Our RapidResponse customer service team is committed to ensuring that you'll always have access to medication and expertise when you need it most.

Paxit® Med Pass System
Setting the new standard in med pass accuracy

Innovative pharmacy solutions.

Innovation for resident-centered care

Paxit helps long-term care facilities provide better care by increasing accuracy and safety while saving time, cutting costs, and decreasing medication waste.

1. Precision packaging with rigorous standards

We package medications in unit-dose blisters using patented dispensing and packaging robotic automation,* including a six-point verification process to ensure the highest accuracy rates.

2. All the medications a resident needs at each scheduled time of day

We package a 24-hour cycle of unit-dose medications in secure, easy, tear-open bags, one for each resident's medications at each time of day they are scheduled. All clearly labeled with complete medication information, Paxit bags are organized to be "nurse-friendly," making it easy for nurses to locate and administer medications during the med pass.

3. Optimized med carts

We provide medication carts expressly designed to organize Paxit bags according to how your nurses pass medications. Streamlined organization, clear labeling, and less bending make carts easier and more ergonomic for nurses to use. Three-sided labeling of resident bins improves visibility and makes it easier to pull meds for the right resident.

4. Operational ease

Remedi delivers Paxit bags in the order your nurses or medication aides pass medications to residents. Paxit also eliminates returns—one of the most time-consuming tasks facilities manage. And nurses no longer need to spend hours requesting refills; routine medications come automatically.

*Patent-pending

Improving outcomes in the areas that matter most

Better accuracy

- Rigorous quality control, including multi-tiered safety checks and expiration date validation
- Separated medications with individual, bar-coded, unit-dose blisters, eliminating co-mingling risks
- Traceability to individual pill level to reduce medication errors and improve recall efficiency
- Cart organization that "reminds" nurses what they've done already, in case of interruptions

Time and cost savings

- Average savings of 30 minutes per med pass, with less frustration and no more fumbling with bingo cards, rolls of pill strips, and counting tablets
- Automatic refills of routine medications
- Elimination of time-consuming returns
- Expedited new admissions med order processing
- More organized med cart for easy access to resident meds

Decreased medication waste

- Reduced on-hand drug inventory from 30 days to two days
- Increased flexibility as residents' medications change
- Environmentally responsible business practices with less discarded packaging material
- Easier identification, pulling, and disposing of industry recalled drugs

Ease of use for nurses

- Complete information printed on bag in large print, with medications listed in same order as the MAR
- Bags organized in cart according to how nurses pass medications
- Tear-open bag and easy pop-out blisters with rounded corners to protect fingers
- Portable bags for easier LOA preparation and discharges
- Three-sided labels on resident bins for greater visibility
- Easy training and learning
- Smooth conversion to Paxit med pass system

Paxit® can help you save up to:

- 25% in med pass time
- 15% in medication costs

"The Paxit System makes our nurses more efficient and more confident."

– Thomas Hauser, LPN

"We have many other things to do, with Paxit we have more time to care for our residents."

– Vinny Kum, LPN

"The conversion to Paxit was easy, the pharmacy provided everything we needed."

– Ashley Ulsch, LPN

"Everything is right there for them. All they have to do is check the pack to the MARs and they're done. It was a pretty easy transition from bingo cards."

– Nancy Allbaugh, RN

"With the introduction of Paxit, we have seen a 20% reduction in our med costs, our nurses are much more efficient, and we've seen a tremendous reduction in the disposal and waste of medications."

– Kevin Williams, RN

The medications your residents need, exactly how they need them
